

Roll·E Collection

This is How We Roll

The hybrid workplace requires new solutions. We designed Roll·E to address those needs. We combined new whiteboard material, efficient storage, privacy, and independently locking compartments so two people can use one cabinet. And we did all this at an affordable price, this is how we roll.

Designed To Do More, Way More

To Do's
1. Meet new hires @ 10
2. Book flight
3. Complete proposal
4. Martinis @5 w/Jan

The whiteboard was designed to be ½” thickness enabling Roll•E to fit between desks for added privacy.

We use Mirlux™, a glass-like material, for Roll•E whiteboards. It is super easy to clean, and doesn't ghost.

A customizable fabric top to create personal space for frequently used items.

Roll•E was created to have 2 independently locking bins. In the hybrid workspace each user has secure storage for personal items.

With a name like Roll•E we had to use the best German low-profile casters.

Sharing What's Good

Budget hawks? We got you covered. We made Roll•E Caddy with back-to-back bins to provide you 2-for-1 value. Simple storage with a whiteboard built-in, perfect.

Caddy shown in Liberty Red, desks ins American Pastime

Where's Roll•E?

You guessed it, in the private office. Today's offices are smaller and flexibly scheduled, that's why Roll•E is available in low versions. Stylish and compact they make a great fit.

Call The Doc...

End of run conditions can be tricky. Use the Roll•E Doc to create a finished aisle approach. Its clever design can fit around any power spine and matches up beautifully with other Roll•E models.
