THE MATERIALS

In addition to its natural appeal, ash wood is resilient, sustainable, and beautiful. Known for its light weight, strength, shock resistance and flexibility ash grants the Moment Tables incredible durability, a soft feel, and excellent mobility.

PERCH TABLES

The Perch is an exceptional tool for dividing larger space or utilizing office nooks and crannies. At standing height and equipped with a foot bar, these tables are opportunity creators, encouraging individuals or small teams to take a beat, touch down, and check in.

COMMUNITY TABLES

With a resimercial aesthetic, the Community Table is expansive yet intimate, allowing for a more casual meeting or multiple small working groups to share a single space. As a centrepiece, Community Tables are an invitation to co-locate and co-create.

MEDIA TABLES

We designed the Media Tables to solve a common problem, creating natural sight lines for digital interaction. The asymmetric taper allows for an equitable experience around the table without awkward leaning in or out.

SESSION TABLES

Comfortable and customizable, the Session Table meets your team where you are at with a wide range of size and height configurations. For the in-person or the digital meeting, the Session Tables will support your team through the brainstorm, the work party, and the deadline.

COMMON TABLES

Common tables can be layered into teaming spaces to encourage collaboration or grouped to form seating clusters in educational environments. Whether for heads down work or socializing, The Common Tables provide a versatile opportunities for groups up to four.

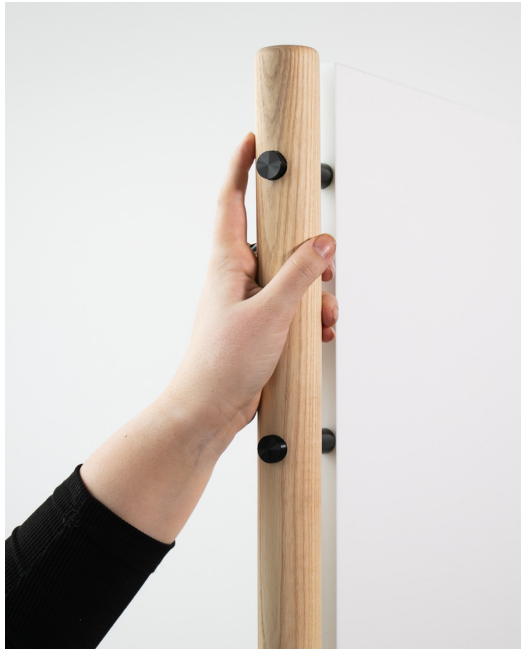

MOMENT BOARDS

Agility of the board was a fundamental design direction. We Achieved this via lightweight materials and intentional touch points. The full-length reveal between the frame and board lends to the impression of lightness, allowing for easy maneuverability with a comfort and minimal effort.

MOMENT DESKS

Moment desking reduces costs and increases flexibility by eliminating the need for a bulky and static panel and power systems. It integrates the revolutionary Byrne Pattern System that allows desks to organically form work pods of up to 12 desks powered of a single three prong plug.

DESKS MOUNTED SCREENS
